

Widgets Layout

The myUMB portal is designed to be a “one-stop shop” to provide access to all systems, applications and news that are relevant to each specific user. To this end, a feature of the portal is that you can customize the widget layout, which is based on a “Masonry layout”, explained below.

Widget Layout

The portal uses a “Masonry layout”, which orders the widgets horizontally. This layout keeps the user’s preferred widgets at the top of the screen.

- Widgets with lower numbers (2, 3, etc) will appear towards the top of the home page left to right and then top to bottom.

- The order adjusts based on the number of columns in view and on the size of the widgets.
- The order may fluctuate as content in the widgets changes and their sizes increase/decrease accordingly.
